SUMMIT 2021**

**THE ROLE OF AGRICULTURAL RESEARCH
AND INNOVATION ON FOOD SYSTEMS
TRANSFORMATION**

VIRTUAL EVENT VIA ZOOM MEETING

 **06 July 2021**  **15:00 - 17:00 CEST**

[CLICK to REGISTER](#)

Aim:

We aim to call the attention on the role of agricultural research and innovation in the food systems transformation. Farming systems need to adapt to climate change, sustain soil and biodiversity and produce healthy and affordable food. This transformation can only happen with the collaboration of all food system actors. Transdisciplinary research needs to be central to boost this transformation of the food system. Good practices and principles will be discussed based on successful cases of transdisciplinary research that resulted from examples of Africa-EU cooperation on this field, as well as recommendations for a long-term strategy for research and innovation.

Speakers:

Yemi Akinbamijo

FARA

Helena Posthumus

DeSIRA-LIFT/WUR

Stephen Onakuse

Agrinatura President

Guy Faure

European Commission

Elisabeth Nsimadala

Pan Africa Farmers Organization/East Africa Farmers Federation

Bongiwe Njobe
